Remember the Jetson's home where curtains draw, lights and music come on with one touch of the button? You can have that now too! Automated Lifestyle can turn ordinary homes into extraordinary automated abodes, easily and affordably! Affordable luxury, that's what we like!

Automated Lifestyle is a home and office automation specialist that promises cutting-edge technology that connects all your necessary remote controls into a single device. Remove the clutter of remote controls for every single appliance with home automation. Whether it is a HDB, two-bed room apartment, penthouse or landed property, Automated Lifestyle has done them all, to good comments too! No home is too big or too small!

With touch screen remote lighting control, motorised curtains and blinds, and even integrated automated security systems and CCTVs that can be viewed on your iPad, your home will transcend into one truly comfortable and convenient.

Apart from that, they also carry multi-room audio distribution. You can control the sound systems from anywhere in your home with an iPad or touchscreen. You can also enjoy ease of mind as you can monitor your CCTV feeds on your iPad - watch what's happening in your home even when you're not there. The integrated security system can also be programmed to turn on the home lights in the case of a security breach.

Check out their showroom for the automated experience. Life will indeed never be the same, because with home automation, there's no need for you to look after the house. It's about time to let the house look after you for a change.
